

This is the sign-up page to the Rigel Zoo Adventures app this will take you to the registration page that will allow users to create a login that they will use to access the apps this will also decide if they're allowed access to the registration page, this will increase security within the app as nobody else will be able to access the app if they try your email and it will notify you when your logged in/ registered to the app.

are now on the screen.

This is the home page this is where you will access all of your needs like shopping and live animals and settings etc. this will allow the users general access to all of the features within the app this will also allow for the users to see the newest additions to the zoo as their images will be updated every time a new species or animal is put into the zoo such as the painted African dogs that

This is the live animal cams these will show the animals that are currently on display if they are being shy or you cannot see them or you cannot come see them then you can

tune in to see them and see what they get up to in their daily life.

May 2024

This page is the registration page this is what allows for users to create a login they will use whilst accessing the app this is because there are online purchases that can be made through this app this means that the app will store your bank details so if anyone else had access to this, they could potential steal your bank information and possibly steal your money.

this is the purchase page made so that users could access tickets and purchase nights at the hotel within the zoo this will allow for easier access to purchasing tickets to the zoo and make it easier for the customers this will allow for more revenue to come in and more consistent customers.

This is the login page this is what a returning customer will see when re-joining the app after deletion or maybe logging out this is designed to keep your details secure from malware and potential hackers looking to steal your money.
